

PTS-2 forecourt controller

PTS-2 forecourt controller is a powerful modern forecourt controller for provision of control over petroleum, LPG and CNG dispensers, automatic tank gauge systems and probes, price signs, RFID readers and AVI systems.

PTS-2 controller knows communication protocols of a great variety of dispensers, ATG systems and probes, price boards, readers and AVI systems allowing to control over any of them in a common way regardless of the brand or communication protocol used.

PTS-2 controller leads internal database for pumps sales, tanks measurements, in-tank deliveries, alerts, GPS records and fuel attendants' and customers' tags. It allows to generate reports using a web browser and also can automatically upload all the registered records to any remote cloud server, allowing to easily remotely receive all detailed reports from the petrol stations, petroleum depots and fuel delivery trucks.

Its dimensions are extremely small with a size of a credit card, which makes its suitable for installation inside any third-party hardware.

FEATURES:

- Credit card size for easy installation in any hardware
- Supports more than 135 brands of dispensers and meters
- Supports more than 50 brands of ATG systems and probes
- Supports simultaneous operation with up to 50 dispensers/meters, up to 50 tanks, up to 50 RFID tag readers, up to 5 price boards
- Built-in web-server for monitoring, configuration, reporting and control
- SSL/TLS layers for secured communication
- GPS module for location tracking at installation on fuel delivery trucks
- Communication interfaces: RS-232, RS-485 and Ethernet
- Rich set of interface converters
- Automatic operation with storage of pumps sales, tanks measurements, in-tank deliveries, alerts and GPS records to local database
- Automatic connection to a cloud server for data upload and remote control from server
- Cost effective

BENEFITS:

- Able to work automatically standalone without POS, or be controlled by POS or work in parallel with existing POS
- Provides easy way to make mobile app connect to dispensers and ATG consoles in parallel with local POS
- Built-in web-server provides easy control and reporting over pumps and tanks even from your mobile phone
